

17.6 CFM

Outline Drawing

Agilent Varian

Technical Specifications			
Free air displacement	60 Hz: 605 l/min (21.4 cfm)	50 Hz: 504 l/min (30.2 m ³ /h)	
Pumping speed	60 Hz: 17.6 cfm	50 Hz: 25 m³/h	
Ultimate partial pressure	10 ⁻⁴ mbar		
Ultimate total pressure	2 x 10 ⁻³ mbar		
Ultimate total pressure with gas ballast	1 x 10 ⁻² mbar		
Water vapor tolerance	30 mbar		
Water vapor capacity	550 g/h		
Oil capacity min/max	0.5/1 l		
Motor rating 1ph	60 Hz: 0.90 kW	50 Hz: 0.75 kW	
Motor rating 3ph	60 Hz: 0.90 kW	50 Hz: 0.75 kW	
Nominal rotation speed	60 Hz: 1800 rpm	50 Hz: 1500 rpm	
Weight kg (lbs)	35 (77)		
Inlet flange	25KF DN		
Exhaust flange	25KF DN		

Ordering Information

All Items Sold On Ideal Vacuum Website

DS 602 replacement MOTOR	
3 phase 208-480VAC, P/N P104166	ô

Minor Maintenance Rebuild Kit, Contains all valves, o-rings and seals to refurbish the pump to vacuum integrity, **P/N P102421**

Major Maintenance Rebuild Kit, includes all the items of the minor kit plus the vanes, **P/N P102525**

To Find Pricing on our website, just copy the *P/N "P------"* and paste it to our search engine on the website at www.idealvac.com

Applications

- Analytical Instruments
- Mass Spectrometry
- Electron Microscopes
- Leak Detection
- Industrial Vacuum Processes
- High Energy Physics
- Research Laboratories (See other side of this Flyer for Features & Benefits)
- Ideal Vacuum Products, LLC Phone: (505) 872-0037 www.idealvac.com or www.pchemlabs.com

Agilent/Varian Rotary Vane Pumps Features and Benefits

A Reliable Line of Pumps to Cover the Most Demanding Industrial and Scientific Applications

Varian Vacuum Technologies' new DS line of Rotary Vane Pumps are designed and manufactured to meet the demanding requirements of various industrial and scientific applications.

Thanks to a very simple and highly reliable design, these field proven rotary vane pumps provide excellent vacuum performance. Varian's guality and manufacturing standards ensure that the DS Rotary Vane Pumps provide high pumping stability for light gases, low noise, minimal oil backstreaming, and a long operating life.

Varian's DS Rotary Vane Pumps conform with CE requirements, and all pump motors are UL and CSA approved. Varian's world class technical support organization makes the DS Rotary Vane Pump cost-effective and well suited for a wide range of applications.

Forced Oil Circulation

operating range.

The dedicated oil circulation gear pump ensures efficient and

reliable lubrication of the pump

throughout the entire vacuum

from atmospheric pressure

Dual Stage Pump

The two stage design allows low 10³ mbar operation, low operating temperature, minimal backstreaming at low pressure, good pumping efficiency and gas ballast in the high 10³ mbar region.

Gas Ballast Valve

The opening of this valve injects air into the second stage of the pump. This action increases the temperature of the module which facilitates the outgasing and clean up of water vapor or other condensibles from the pump fluid.

Socket Type IEC320

permits use of standard power cables, eliminating the need to open box and wire the motor.

Built-in Oil Shield

This feature minimizes the oil mist at the pump exhaust. Apart from drastically reducing the oil consumption over long periods of operation, this results in a reduction of air pollution limiting the impact on the environment.

World-wide Motors

Pump motors, available as 1-phase or 3-phase, are suitable for all voltages and frequencies world-wide. Operational voltages are easily selectable, allowing greater flexibility, easy planning and inventory reduction.

Forced Air Ventilation

The cooling fan between the motor and the pump reduces the pump operating temperature, lowers the oil vapor partial pressure, minimizes oil backstreaming and vacuum system contamination.

Accessories (All Sold on Ideal Vacuum Products Website)

P/N P101878

P/N P103219 **KF25 Exhaust Mist Filters**

P/N P101442 GP Oil P/N P101441
