Coupling

Any quick-connect stem will fit any quick-connect body of the same series and size.

Examples: Any QC4 stem will fit any QC4 body.
Any QC8 stem will fit any QC8 body.

Single- and Double-End Shutoff Stems

Single-end shutoff (SESO) stems have no valves and remain open when uncoupled.

Double-end shutoff (DESO) stems have valves and shut off when uncoupled.

Spillage

Spillage is the amount of system fluid that escapes when a quick-connect is uncoupled (DESO only).

Air Inclusion

Air inclusion is the amount of air trapped between the body and stem that enters the system when a quick-connect is coupled (DESO only).

Flow Coefficient (C_v)

C_v is an average value and may vary $\pm 10\%$. C_v is based on like end connections on stem and body. For unlike end connections, average the two C_v values.

End Connections

Additional end connections—such as ISO parallel and tapered thread, AN thread, pipe weld—are available. Where these end connections are not listed, a tube adapter can be used to create a two-piece assembly. For more information on tube adapters, see the Swagelok *Gaugeable Tube Fittings and Adapter Fittings* catalog, MS-01-140.

Operation of Swagelok Quick-Connects

- Use filters ahead of quick-connects.
- Use body and stem protectors or dust caps on uncoupled bodies and stems.
- Align bodies and stems when coupling or uncoupling.
- Couple and uncouple quick-connects at room temperature.
- Couple and uncouple quick-connects during system cleaning operations.
- Support hanging hoses or other equipment to prevent side load.
- Relubricate stem seal O-rings periodically.

⚠ Warning:

- Pressure rating restrictions apply when coupling and uncoupling.
- Do not uncouple single-end shutoff quick-connects under pressure.

Caution:

- Do not rotate quick-connects while coupled.
- Do not insert foreign objects into uncoupled bodies or stems.

Instrumentation Quick-Connects QC Series

Features

- Redesigned stem insert requires just one O-ring seal, yet improves O-ring containment.
- New-design stems and bodies interchange with old-design stems and bodies.
- Locking dog mechanism with large contact area retains stem.
- Push-to-connect coupling enables quick, easy operation.
- Wide variety of options, including keyed quick-connects, are available.
- Heavy-duty sleeve shields open end of body.

Full-Flow Quick-Connects

A full-flow QC series quick-connect consists of a SESO stem and a full-flow body.

To order a SESO stem, select a basic ordering number and add a material designator.

Example: **SS-QC4-S-200**

To order a full-flow body, select a basic ordering number and add a material designator and **MB**.

Example: **SS-QC4-B-200MB**

Stem and Body Protectors

Stem and body protectors guard against damage and contaminants when bodies and stems are uncoupled.

Protectors are not pressure-containing devices; for pressure-retaining protectors, contact your authorized Swagelok representative.

Keyed QC Series

Swagelok keyed quick-connects provide a positive mechanical lockout system to prevent accidental intermixing of different lines in multifluid or multipressure systems.

Features

- Keyed quick-connects will not interchange with any other Swagelok keyed quick-connects
- If an attempt is made to couple unlike keys, the valve system will not open.
- Stems and bodies are color coded and numbered for easy identification.

Ordering Information

To order, replace **B** in the ordering number with **B2**.

Example: SS-QC4-B2-400

B2 style bulkhead body is available only with low-profile IS sleeve.

Low-Profile Sleeve

This option is available for use in areas where space is limited.

Ordering Information

To order, add **IS** to the ordering number.

Example: SS-QC4-B-400IS

Additional End Connections

Other end connections may be available from the factory as two-piece components. Contact your authorized Swagelok representative for information.

Full Flow Quick-Connects QF Series

Features

- Compact coupling offers full flow without orifice restrictions.
- O-ring is easily replaced without disassembling body.

Full-Flow Quick-Connects

A full-flow QM series quick-connect consists of a SESO stem and a full-flow body.

To order a SESO stem, select a basic ordering number and add a material designator.

Example: **SS-QM2-S-200**

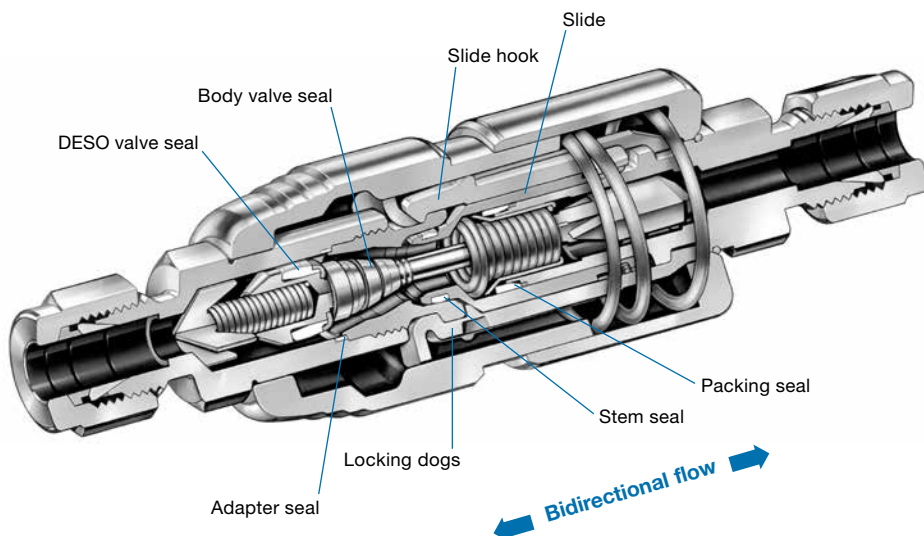

To order a full-flow body, select a basic ordering number and add a material designator and **MB**.

Example: **SS-QM2-B-200MB**

PTFE-Sealed Quick-Connects QTM Series

Features

- Product qualification tests are based on ANSI B93.51M.
- Flush valve design reduces air inclusion and spillage.
- Locking dog mechanism with large contact area retains stem.
- Seals are recessed for protection.
- Keyed option is available.
- Push-to-connect design enables quick, simple operation.

Options, QTM Series

Keyed QTM Series

Swagelok keyed quick-connects provide a positive mechanical lockout system to prevent accidental intermixing of different lines in multifluid or multipressure systems.

Features

- Keyed quick-connects will not interchange with any other Swagelok keyed quick-connects
- If an attempt is made to couple unlike keys, the valve system will not open.
- Stems and bodies are color coded and numbered for easy identification.

Body and Stem Protectors

Body and stem protectors are available. Contact your authorized Swagelok representative.

Bodies with Release Button

QTM series bodies are available with an optional release button to prevent accidental uncoupling.

For more information, contact your authorized Swagelok representative.

QTM Series Key Numbers

QTM2 and QTM4 series quick-connects are available in keys K1 through K8.

QTM8 series quick-connects are available in keys K1 through K4 only (black, orange, green, or yellow).

Keyed QTM series sleeve dimensions are the same as the standard QTM sleeve dimensions given in the **Ordering Information and Dimensions** tables.

Key Color	Key Number and Designator
Black	K1
Orange	K2
Green	K3
Yellow	K4
Blue	K5
White	K6
Purple	K7
Brown	K8

Ordering Information

To order, add a key number designator to a QTM series quick-connect ordering number.

Example: SS-QTM2-S-400**K1**

Caution: Do not mix or interchange parts with those of other manufacturers.
